**Sophie Loves, Recommends**

... and gets somewhat specific about which products you might want & need to stay Gorgeous For Good.

Thanks so much for grabbing a copy of my “Sophie Loves ...” recommendations. This is by no means an exhaustive list, and it will be updated as and when needed, however, I think I’ve provided you with a pretty varied selection of choices for your skin type and age. I’ve also recommended a plethora of other products, which I believe to all come under the “Gorgeous For Good” umbrella, because beauty goes way beyond our skin… it’s what we eat, drink, allow in our homes, and most importantly how we treat ourselves and others.

To get and stay gorgeous is a completely holistic endeavor, which encompasses makeup, skin care, nutrition, fitness and most importantly, spirit. This is the reason why I wrote my brand new book - **Gorgeous For Good: 30 Days to Lasting Beauty Inside & Out** - so that I could distill all of the things we need to do into an easy 30-day program that will (I promise you) completely transform the way you look and feel.

May I be so bold as to recommend you be one of the first to own a shiny, new copy of my new book, Gorgeously Good, by clicking here. I have addressed all your very specific skincare, nutritional, and fitness concerns in great detail – leaving no stone uncovered.

OR

I would love for you to join me at my first ever live-streamed beauty-from-within seminar on February 9th, and guess what? If you pre-order a copy of Gorgeous For Good now, you get the seminar for FREE - total win/win right?

So, I’m hooking you up ladies! You’ve got my product recommendations here – now all you need is my program. My deepest desire is that you all discover a way of life that makes you feel younger, stronger and more vibrant than you did 20 years ago. My program works ... it really does.

I look forward to seeing you at the seminar to engage with you, and even answer some of your questions live.

In the meantime, I hope you find the product recommendations that you’re looking for.

Product Love

Over the years, I have come to know and love so many wonderful skin care, beauty and healthy home brands. I have been lucky enough to take almost every product that I recommend to you in this book on an extended test drive. If the products weren’t targeted for my age and skin type, I called on my trusty team to test them for me.

My Trusty Team

Lola, my 13-going-on-18 year-old daughter is my tester for oily/acne prone skin, and has graciously tested a plethora of brands (and is brutally honest!).

The gorgeous Katharine is my tester for brands that skew toward a young and healthy skin (that needs to stay that way). I look at Katharine and wish that I had applied all these preventative products to my skin when I was in my twenties.

Lena is a gorgeous actress and part-time beauty editor, who is extremely picky about skin care products. She tests products for a healthy thirty-something skin, who wants to take as many preventative steps as she can to avoid more drastic measures later down the line.

Julia is my sensitive/Rosacea girl. She tests the products that absolutely need and have to be okay for very dry/inflamed skin.

Joseph Uliano, my long-suffering husband has tested hundreds of “anti-aging” products for me over the years. He’s a rather unwilling victim – but really… does he have a choice?
Cherry Picking

I think the smartest thing to do is to cherry pick different products from different brands. Almost every brand that I love has their hero products, or very specific ones that have really worked for me. I never get all my products from one brand, and neither should you – because you’re likely missing out on something that could blow you away!

Gorgeously Green Criteria

When you get your hands on a copy of my new book, Gorgeous For Good: 30-Days To Lasting Beauty Inside & Out, you’ll learn (in great detail) how to choose a product that’s right for you, based on all kinds of criteria. You will learn which ingredients you need to embrace and which you need to avoid like the plague. You will learn how to combine specific products and how to completely reboot your entire beauty regime from top-to-toe, from morning-to-night.

But, for the purposes of this simple guide, just know that each and every product I have chosen has had to go through my strict vetting process. Remember, I’m only interested in products that smell good, feel good and DO Good (and produce outstanding results). It’s taken me years to get to know and trust many of these companies, so my recommendations come with great love and respect for all involved.

I have also tried to supply you with a range of products to suit every budget. Please keep in mind that truly natural skin care products (and particularly those that are organic), are going to cost more than your average mass-produced drugstore brand. But you get what you pay for … and good ingredients will work with your skin naturally, truly keeping your Gorgeous For Good!
General Skin Care recommendations for your age:

These are very generic recommendations because many of these brands fall into both categories. However, I’ve tried to separate them out because I get a lot of questions asking for particular age recommendations. Also, if you have normal, unblemished 20-year-old skin, you may not need the hard-hitting products that we have to reach for when we march over a certain hill!

Also remember, good beauty products aim to nourish the health of your skin, rather than to simply mask symptoms such as dryness. All of the of brands I recommend do just that.

Juice Beauty has been a firm fav of mine for years, and I've loved to see how the company has evolved from its humbler beginnings to now bring us cutting edge anti-aging products that pack a powerful punch in terms of their proactivity. They have a huge line to choose from, as well as lovely makeup.

Painted Earth is a relatively recent discovery for me, and so happy that they came across my radar as their products are all stellar in terms of packing a great pro-active punch, while being affordable.

PureCeuticals is another recent discovery that I immediately latched on to because they are so smart and knowledgeable about their formulations. There are certain brands out there that everyone raves about on the Internet (not saying which ones!) but that pale in comparison (especially in the serum department) to these babies!

I have been using Ren Skincare for years because of their unique, powerful and very clean formulations for maturing skin – love!

You only have to try Sarah Chapman products once to know how truly special they are. Every line is great (truly), but when in doubt, try their “Help Me Choose” function on their website for amazing recommendations!
I am seriously impressed with the science behind the Sircuit skin products. Because I am a scientific research
nerd when it comes to formulas I was intrigued by how 
these uber-effective formulations were created, and the thinking behind them. They are 
known because of their use of “chirally correct” ingredients – meaning the ingredients are manufactured in a form that it recognized and thus utilized by our skin.

Dr. Julia T. Hunter is a brilliant and very unique dermatologist because she combines a very holistic and very scientific approach into her carefully formulated products. The strength, delivery system and efficacy of her product have to stand up to the scrutiny of some of the biggest names in Los Angeles – and they do!

Great name – great products. Powered by Korean herbal medicine, Sulwhasoo is luxury in a bottle. I love that they offer their lines by concern - correction, hydration, protection, brightening – everything you need to be absolutely radiant.

I haven’t been without at least two Sunshine Botanicals products in my bathroom since I first discovered them a couple of years back. Holistic aesthetician, Emily Fritchey, is the brainpower behind this hugely intelligent line, which literally ticks every single one of my boxes.

Right up my alley – Tammy Fender’s entire holistic skin care line is organic and absolutely Gorgeously Green!

Julia Hunter M.D. Maximal Strength Peel
$179  www.juliathuntermd.com
This peel is for your face and body, but it’s so strong that you should do your face and body separately. Also, I wouldn’t recommend doing your entire body in one session: start with your arms and torso, then next session do your lower bod. If you have really bad sun damage, and dull/dry (prematurely aged skin), this is a recommended peel.

Great Peptide Creams and Serums

I recommend using peptides big time! Although they are not miracle ingredients (as some marketing blurbs make them out to be), they are very promising, and what I think will become a huge part of pro-active skin care in the future. Botox Alternatives

Although it’s important to be clear that no skin care product will immobilize your muscle contractions in the same way that Botox does, some powerful Peptides such as Argireline will help to soften your muscular contractions, and thus products containing this Peptide are often considered to be a promising, less invasive alternative to botox. The long-term side effects of using a Peptide complex such as Argireline (trade name for a Peptide called acetyl hexapeptide-3), haven’t been studied long-term. Also the muscle-relaxing effects only last for about 3 hours, so important to weigh up the pros and cons

I love the Michael Todd Soniclear Cleansing Brush – not only is it lightweight and chic, but it’s also a perfect addition to any skin cleansing regimen. It even improves product absorption for an even more meaningful process! The two things that make the Soniclear brush stand above most of its competitors is that there is an interchangeable face/body brush, which means that you don't need to buy a different brush for your body. There are 3 different built-in speeds for both your face, and your body. But the thing that makes this brush totally unique is that it is the world's first brush to be antimicrobial, which is vital because any other cleansing brush sitting in your shower get pick up bacteria within hours!

Mineral Fusion polishes just never seem to chip, so they are perfect for a long-lasting pedi.

Spa Ritual

PritiNYC Nail Polish
$9 - $22.50  
[www.pritinyc.com](http://www.pritinyc.com)  
I’m crazy about PritiNYC polishes, and all their delectable shades. Every few months they come out with a new seasonal collection, and their soy polish remover is off the charts (because it’s the one remover that doesn’t dry out your nails).
Perfume

Wow - I’m natural perfume obsessed, and am happy to report that these new artisan perfumes smell nothing like what your grandma wore. I have become very sensitive to the chemicals in synthetic perfumes – just one whiff in an elevator or store can leave me feeling nauseous and dizzy. These cheap perfumes are not only cloyingly sweet/sickly, but full of harmful chemicals. Check out my healthy picks below:

Tsi La
$44 - $125  
tsilorganics.com
Tsi La perfumes are completely organic, healthy, and come in the prettiest bottles, which you’ll want to pop in your purse, or showcase on your vanity. There’s not one scent that I don’t love.

The Organic Pharmacy Perfume Collection
$249  
www.theorganicpharmacy.com
These are the perfumes that I save up for. I need to start an Organic Pharmacy Perfume fund because these perfumes are beyond anything I’ve ever smelled. The Eau Oud is so popular that when I was in the store in Beverly Hills, a woman came in from Dubai and snapped up 10 of them!

La Vanila The Healthy Fragrance: Coconut Vanilla Spray
$58  
www.lavanila.com
This sweet (but not cloying sweet) delectable fragrance reminds me of being on vacation in Tahiti – ohhhh, take me back! The Healthy Perfume collection is huge, with sprays, roller balls, and perfume oils - all completely non-toxic.

Gwendolyn Mary Perfume
$45  
www.gwendolyn-mary.com
Whenever I wear a Gwendolyn Mary perfume, someone swoons: “OMG – what are you wearing?” Perfumer Kathleen Laccinole went to Grasse in France to study perfumery and learned from some of the best “noses” in the world. Her beautifully presented collection of perfumes are hand-poured into small roller bottles that you are supposed to layer, depending on how you feel. Kathleen likens the chords of her perfumes to the musical chords, and even suggests which piece of classical music you may like to listen to while you burn one of her perfumed candles.

**Aiya Matcha To-Go Stick Packs**

**Beverages / Water**

**Tula’s CocoKefir Probiotic Drink and Pudding**

$18 - $32.95  
[www.pureinventions.com](http://www.pureinventions.com)
Pure Invention drops are a genius way to enhance your water and take it to an entirely new level. I just love their green tea extract drops – a great way to get all those powerful anti-oxidants in your regular water!
The Goodly Company - Humic and Fulvic Acid concentrates
$20 - $151  thegoodlyco.com/
Have you heard of Black Water? Sounds strange right? Well - it's actually very cool stuff because it's made from humic acid, which is one of the purest/richest mineral sources on Earth. The Goodly Company is my favorite source of "black water" because not only are they backed up with research and the kind of certifications that are important, but they also offer a number of concentrates, which are super beneficial for detoxing, boosting metabolism, strengthening immunity, and much more.

Mavea Water Pitcher
$34.95  www.mavea.com
My favorite water filter pitcher by far is the Elemaris by Mavea. You don’t need to pre-soak the filter, there are no strange black bits floating around your water, it removes all the really harmful stuff, and your water tastes amazing (plus, I’m a sucker for the gorgeous pitcher design and choice of colors!)

LifeSource Water Whole Home Water Filtration System
www.lifesourcewater.com
I get asked a lot of questions about my recommendations for the best home system, and LifeSource is the one! This is a family-run company who cares about the environment. Unlike reverse osmosis, which wastes precious water and takes the good out with the bad, the LifeSource technology removes everything you don’t want in your water, while keeping the important minerals in.
In and Around your Home

I believe in holistic green living, which includes your home! From cooking to cleaning to comforts, you can do it gorgeously without sacrificing anything!

**The GreenPan**
$8.99 - $129.99

**Coyuchi Organic Robes and Loungewear**
$57 - $176  
[www.coyuchi.com](http://www.coyuchi.com)
If you are getting your organic green lifestyle on, it makes sense to wrap yourself in soft organic fabrics. I just adore all the loungewear, robes and bedding from Coyuchi - the ultimate in eco-luxury. Their [Verbena Pant](http://www.coyuchi.com) is my new fav lounge-around/yoga pant because its airy, comfy, and very flattering.
360 Cookware
$79.95 - $399.95  www.360cookware.com
I don’t even know where to start with 360 Cookware, but I can tell you – I’ve gotten rid of a majority of my pots and pans after trying out this line. Each product uses vapor cooking technology, eliminating the need for oils or fats in cooking, plus foods cook much faster and more flavorful. I love them.

Live Longer Pillow
$399 - $499  livelonerpillow.com
I honestly thought this was a load of hogwash until I tried one of these pillows. They are filled with Pinus Cembra wood shavings – this is a wood sourced sustainably from rare forests in the Northern Hemisphere, where this wood is understood to release all kinds of benefits related to deep sleep and stress relief.

I have to admit that I know can’t sleep without my Live Longer pillow, which I wrap my arms around to stretch out my shoulders. It works beautifully for this purpose because a regular pillow heats me up too much, whereas this pillow keeps my body at a perfect temperature (despite the onset of hot sweats!)

Blendtec Blenders
$279.95 - $1034.95  www.blendtec.com
Blendtec is truly the king of blenders. These machines to everything gorgeously - From smoothies to soups to sauces, even homemade beauty products. This is definitely the most used machine in my kitchen!
